LP500

- | Rubber-coated design, better resistance to impact
- | Strong magnetic design on the top, better usability
- | Usage distance $\geq 500\text{m}$ (with K-LEVEL rotary laser)
- | Usage distance $\geq 300\text{m}$ (with other rotary laser)
- | Equipped with a clamp
- | No.5 alkaline battery

HIGH SPEED | magnetic | AutoSound | IP 66 | 2x AAA | HARD

LP700

- | Rubber-coated design, better resistance to impact
- | Strong magnetic design on the top, better usability
- | Usage distance $\geq 400\text{m}$ (with K-LEVEL rotary laser)
- | Usage distance $\geq 300\text{m}$ (with other rotary laser)
- | Equipped with a clamp
- | No.5 alkaline battery
- | Display the distance

HIGH SPEED | magnetic | AutoSound | IP 66 | 4x AAA | HARD

PRODUCT DESCRIPTION

The LP500 laser detector is useful for locating the red (or green) laser line generated by a rotating laser under conditions where the laser line is not very visible, such as in strong light or during outdoor use. This unit can be preset to detect the laser line at distances of up to 300 meters, with a sensitivity range of less than ± 1.5 millimeters at 30 meters. It features three types of audible alarm tones to assist in aligning the laser beam.

SAFETY INSTRUCTIONS

Ensure that the batteries are used.
Ensure the batteries are inserted in the correct manner, with the correct polarity.

Operation

1. Turn on the instrument by pressing the Power ON/OFF pad.
2. Expose the beam capture window of the laser detector towards the direction of the Laser Line.
3. Slowly move the laser detector in an upward and downward direction until the LCD beam indicator arrows appear and/or a pulsing audio signal is heard.
4. Move the detector downward when the high laser LED is lit (With volume on, a slow pulsing audio tone is heard). Move the detector upward when the low laser LED is lit (With volume on, a rapid pulsing audio tone is heard). When the line is level, the level beam LED will be lit (With volume on, a solid audio tone will be heard).

If the detector does not detect a pulse laser line after 1 minute, the detector will shut lights off, after 10 minutes, the detector will automatically shut itself off to preserve battery life. Turn the instrument back on using the power button.

Press the light ON/OFF pad to open or close the lights

Press the Power ON/OFF pad to shut the instrument off.

Specifications

Dimensions	Weight	Bandwidth Sensitivity
140mmx70mmx26mm	145g (without battery)	Fine ± 1 mm Coarse +1.5mm
Receive range	Readout	Power
500m (K-LEVEL rotary laser) 300m (other brand)	LED screen two sides	Two AAA batteries

Battery Compartment Cover

Power Button

- 1.Short press the
- 2.Short press while powered on to toggle the backlight
- 3.Press and hold for ≥ 3 seconds.

High-low precision switch button

- 1.The default startup precision is high precision, Display:
- 2.Press the Precision Button to switch to Low Precision, Display:
- 3.Press again to cycle back to High Precision

Volume shift button

- 1.The default startup volume is high volume, Display:
- 2.Press the Volume Button to switch to Low Volume, Display:

3.Press again to mute, Display:

4.Press again to cycle back to High Volume

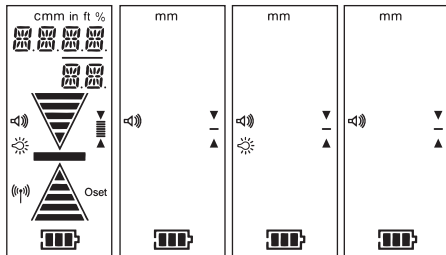

Precision red laser

Ensure the battery compartment's center aligns with the sticker's center (tolerance: ± 1 mm)

Distance	Precision	
	High precision	Low precision
40m	1.2mm ± 1 mm	2.4mm ± 1.5 mm
300m	Reception stabilization	Reception stabilization
Leveling accuracy (high)	1mm	
Leveling accuracy (normal)	2mm	
Leveling accuracy (low)	5mm	
Leveling accuracy (lowest)	10mm	
Laser receiving window width	135mm	
Working radius	350m	

30m digital range measurement $+50 \sim -50$ mm 100mm ± 3 mm

Power ON/OFF

- 1.Press the power button to turn on the detector
- 2.Upon startup, the LCD will briefly display all icons for functionality check (Allow checks to ensure the LCD is working properly).
- 3.Hold for ≥ 3 seconds to turn off the detector

Unit/ Precision

Metric millimeter	Imperial inches (Display as decimal)	Imperial inches (Display as fraction)
1mm	0.05in	1/16
2mm	0.10in	1/8
5mm	0.20in	1/4
10mm	0.50in	1/2

Buzzer

- High volume
- Low volume
- No sound

Zero Calibration

Press the SET Button within the receiver range (numeric display) to set the current laser position as the default zero point.
