Professional Sales Program 2025

RC100

- With power switch
- Two-way communication, remote control
- Independent function buttons, easy to operate
- Usage distance≥150m
- Real-time function indicator, quickly understand the Main Machine working status
- No. 5 alkaline battery
- Laser rotation speed 300/600/1000rpm

150M INERARED REMOTE CONTROL

RC200

- Two-way communication, long-distance control
- Independent function buttons, easy to operate
- Usage distance≥300m
- Real-time function indicator light, quickly understand the working status of the Main machine
- With a power button, understand the working status of the Main machine at any time
- Built-in lithium battery pack, super long working time
- Rubber-coated design, better resistance to falling
- Laser rotation speed 300/600/1000/1500rpm

300M INERARED REMOTE CONTROL

RC300

- LCD Screen, more convenient slope setting
- Two-way communication, long-distance control
- Independent function buttons, easy to operate
- Usage distance≥300m
- Real-time function indicator light, quickly understand the working status of the Main machine
- With a power button, understand the working status of the Main machine at any time
- Built-in lithium battery pack, super long working time
- Rubber-coated design, better resistance to falling
- Laser rotation speed 300/600/1000/1500/3000rpm

300M INERARED REMOTE CONTROL

Rotary Laser

X-axis horizontal angle indication

Y-axis horizontal angle indication

Clockwise rotation function key

Counter clockwise ratation function key

Manual automatic indication

X + 00.21°
Y + 00.05°

Speed indicator

600 RPM

015°

Scanning angle indication

Directional scanning function reduction (cycle key)

enter

back

Speed switching function key(cycle key)

X&Y-axis direction slope adjustment function key

set

Vibration measurement mode function key

Vibration alarm mode function key

Manual/Automatic mode switch key

On/Off key

Enter the slope setting display interface

X + 0.00 %
Y + 00.0 %

——— RPM   ———°
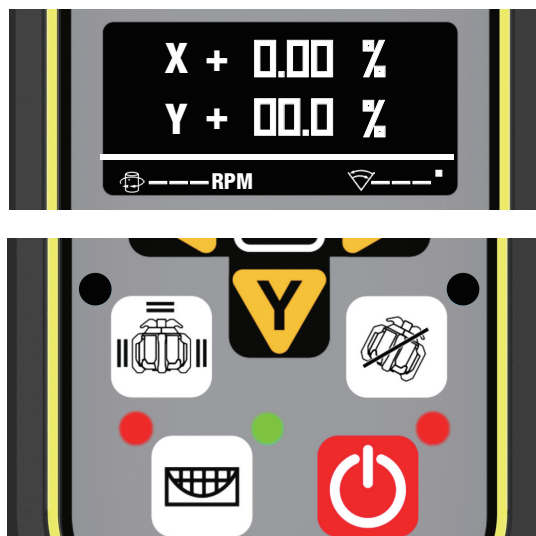

Slope Setting Steps Overview

1 Enter manual mode

4 Confirm and input value and press the [enter] to automatically start the slope movement

2 Press and hold the set key (3 seconds) to enter the following interface

⚠ If there is an input error, reset it with [back]

3 Press ▷ to move the cursor

Press Y/Y to change the value
